**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9, 21-28, 35-38, and 49-52 drawn to controlling access to a plurality of storage locations in a memory, classified in class 711, subclass 152.
  - II. Claims 10-20, drawn to configuring multiple memory modules, classified in class 711, subclass 5.
  - III. Claims 25-34, 39-48, and 53-62 drawn to a method to process request and response transactions in a memory device, classified in class 711, and subclass 146.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as storing authentication password or signature key. Invention III has separate utility such snooping transactions on a bus. In any case, having registers storing three locking bits which include a read lock bit, a write lock bit, and a lock-down bit, wherein the read lock bit and the write lock bit

Art Unit: 2188

are permanent until reset when the lock-down bit is set is not a requirement of invention II and III. See (MPEP § 806.05 (d)).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and each group required a different and separate search, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
